Prepared: 20 July 2026 | Database: uiri_ims | Hierarchy: Campus -> Parent Department/Directorate -> Section/Unit

1. Document Purpose and Database Interpretation

This document presents the organizational master data used by the UIRI Inventory Management System for the Nakawa and Namanve campuses. It mirrors the application hierarchy: each campus contains parent departments or directorates, and each parent contains one or more sections or units. Codes, manager names and contact emails are shown where they exist in the database seed.

BRANCHES / CAMPUSES	1: MANY	PARENT DEPARTMENTS / DIRECTORATES	1: MANY	SECTIONS / UNITS
UIRI Nakawa UIRI Namanve	branch_id	39 active parent records	section_id	111 shown by live UI 102 verified from repository data

Live-data reconciliation

The live application screenshot reports 111 active sections and units. The current source-controlled database seed and canonical migration reconstruct 102 named records. The 9-record difference consists of live-only additions that are not contained in the available repository SQL export. They have not been guessed or fabricated in this document. A current live SQL export will allow those nine records to be inserted verbatim.

2. Campus Summary

Campus	Parent departments / directorates	Verified sections / units	Database role
UIRI Nakawa	23	60	Headquarters, production systems, product development, laboratories, administration and support services.
UIRI Namanve	16	42	Heavy manufacturing, machining, industrial automation, vocational skilling, engineering stores and technical support.
Total	39	102	Source-controlled records listed in this document.

The detailed schedules below are grouped by campus and parent department/directorate. This arrangement is suitable for database verification, inventory classification, user assignment and report filtering.

3. UIRI Nakawa - Parent Department / Directorate Register

#	Parent Department / Directorate	Code	Description / Functional Scope	Verified Units
1	Agro-Production and Value Addition Laboratory	AGRO	Agricultural product development and testing	3
2	Bakery and Confectionery Technology Section	BAKERY	Bread, pastry and confectionery production	4
3	Bamboo Processing Section	BAMBOO	Bamboo crafts and material processing	3
4	Central Warehouse & General Stores	STORES	Central receiving, stores control, warehousing, stock custody and institutional issue coordination	1
5	Ceramics and Materials Processing Section	CERAMICS	Pottery, ceramics and advanced materials	3
6	Chemistry Analytical Laboratory	CHEM	Chemical analysis and quality testing	3
7	Civil Works & Estate Management	CIVIL	Estate management, facilities maintenance, civil works coordination and infrastructure support	1
8	Dairy Processing Technology Section	DAIRY	Milk and dairy products processing	4
9	Executive Directorate	EXEC	Executive leadership, institutional strategy, governance and senior administrative oversight	1
10	Finance and Accounts Department	FIN	Financial control, accounting, budget monitoring, payments and statutory reporting	1
11	Fruits and Vegetables Processing Section	FRUITS	Fruit and vegetable preservation and processing	4
12	Handmade Paper Technology Section	PAPER	Paper production and paper craft technology	3

7. Live Database Reconciliation and Extraction Query

The following read-only SQL query reproduces the exact table shown by the application, including all live-only rows. Run it in phpMyAdmin against the deployed uiri_ims database and export the result as CSV. The exported file can then replace the nine-record reconciliation variance without changing the document structure.

```
SELECT
  b.name AS campus,
  s.name AS parent_department,
  s.code AS parent_code,
  d.name AS section_unit,
  d.code AS section_unit_code,
  d.manager_name AS manager,
  d.contact_email,
  d.description
FROM departments d
JOIN sections s ON d.section_id = s.id
JOIN branches b ON s.branch_id = b.id
WHERE d.is_active = 1
      AND s.is_active = 1
ORDER BY b.name, s.name, d.name;
```

8. Source-Controlled Data Basis

Source	Purpose
database.sql	Original campus, parent department and section/unit seed records, including codes, managers and contact emails.
database_enterprise_departments.sql	Nine additional enterprise parent departments/directorates for Nakawa and Namanve.
migrations/2026_07_canonical_inventory_structure.php	Canonical 39-parent structure and one canonical unit under each parent.
pages/departments.php	Application query, sorting order, active-record count and live table columns.
Uploaded live interface screenshot	Visual reference confirming the live count of 111 and the presentation used by the deployed system.

Repository reference: keithpaulkato/ui-ims, main branch, reviewed at commit f206b9e58f627ca6fbd07eab7d873c448ef66085 on 20 July 2026.

Prepared for database documentation, inventory classification and organizational master-data verification.
